

Bearing Condition Analyzer -110

Bearing Condition Analyzer BVT-110.

MCM Presents a small Micro Processor based diagnostic tool for comprehensive condition analysis of rotating machinery.

Objective measurements of machine condition are needed as a reliable base for preventive maintenance. Now maintenance personal can analyze bearing condition with a single and easy to use instrument.

The best way is to periodically monitor bearing condition and replace the bearing at the right time by least influencing the production efficiency.

- Mechanical Condition of bearings
- Lubrication condition of bearings
- Damage severity readings for rolling bearings.
- Direct indication of machine condition in terms of good - reduced - bad.
